

Growing up fast

Once your eggs have hatched, the baby birds will grow really quickly! In just a few weeks, they will change from tiny bald chicks to fully feathered fledglings, ready to face the outside world!

A great way to keep track of the changes that happen is to either draw what your chicks look like every couple of days, or if your nest box camera is attached to a computer, you can save an image from the nest box each day...

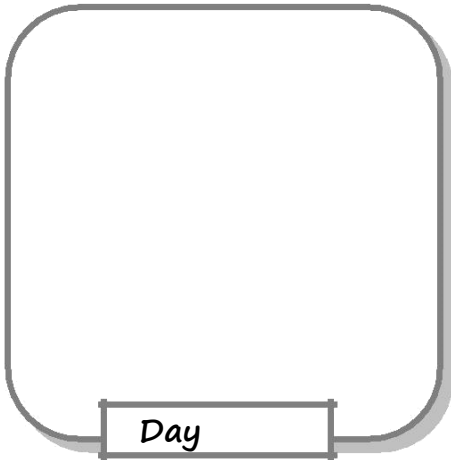

Keep an eye out for our wing feathers starting to grow and when we start exercising our wings
