

Make a nesting feeder

Birds need to search to find the materials they need to make their nest. You can help them out by making your own nesting feeder!

Just take an ordinary feeder and pack it with all the materials for a perfect nest!

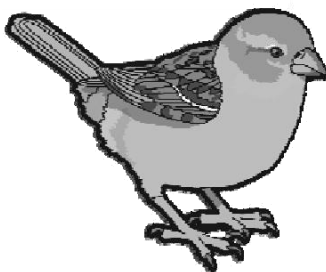

Pull the hair out of your family's hairbrushes.

Do you have any old feather pillows? Use some of the feathers in your nesting feeder.

Use some of the moss from last summer's hanging baskets.

Collect some hay and dry grasses.

Give your dog, cat or horse a brush and use their hair.

Do not use artificial items but stick to things birds might be able to find naturally.
