

# Who might nest in our nest box?

The kind of nest box that you have is designed to copy the kind of place that birds would nest in the wild. Blue tits, great tits and house sparrows are the species most likely to use your nest box as they like nesting in holes in trees.

How much do YOU know about these birds that might use your nest box? Use the Internet or books to answer these questions...

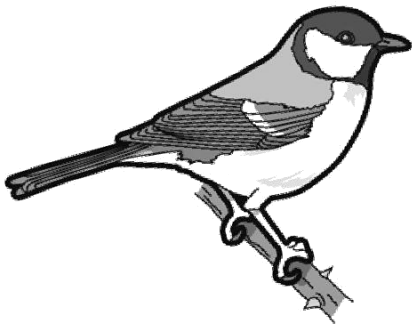

This bird is a \_\_\_\_\_

They eat \_\_\_\_\_

They are about \_\_\_\_\_ cm long
